Millburn, NJ 07041-0031

The Federal Open Market Committee is the rate-setting arm of the Federal Reserve (the "Fed"). Changes in key interest rates and the Fed's outlook on inflation and economic growth usually occur on scheduled meeting dates. Additional un-announced meetings may occur in response to significant market events.

Associated with high volatility, Quadruple Witching hour is the final hour of trading days where equity options, single stock futures, index options, and index futures contracts expire.

U.S. stock markets tend to follow the New York Stock Exchange (NYSE) holiday schedule. Banks and bond markets tend to follow the Federal Reserve schedule.

It's a good idea to keep these dates in mind when scheduling important portfolio or recordkeeping changes, especially if a blackout is required.

Bellwether Consulting is an independent investment advisor serving the needs of retirement plan sponsors and other institutional investors.
